

SURVEYING GUIDE

# ALUMINIUM ROOF LANTERN

Aluminium Window and Door Specialists.  
[www.framexuk.com](http://www.framexuk.com)

When specifying the dimensions of your lantern, you should provide the external dimensions of your upstand **and** the fitter water proof membrane.

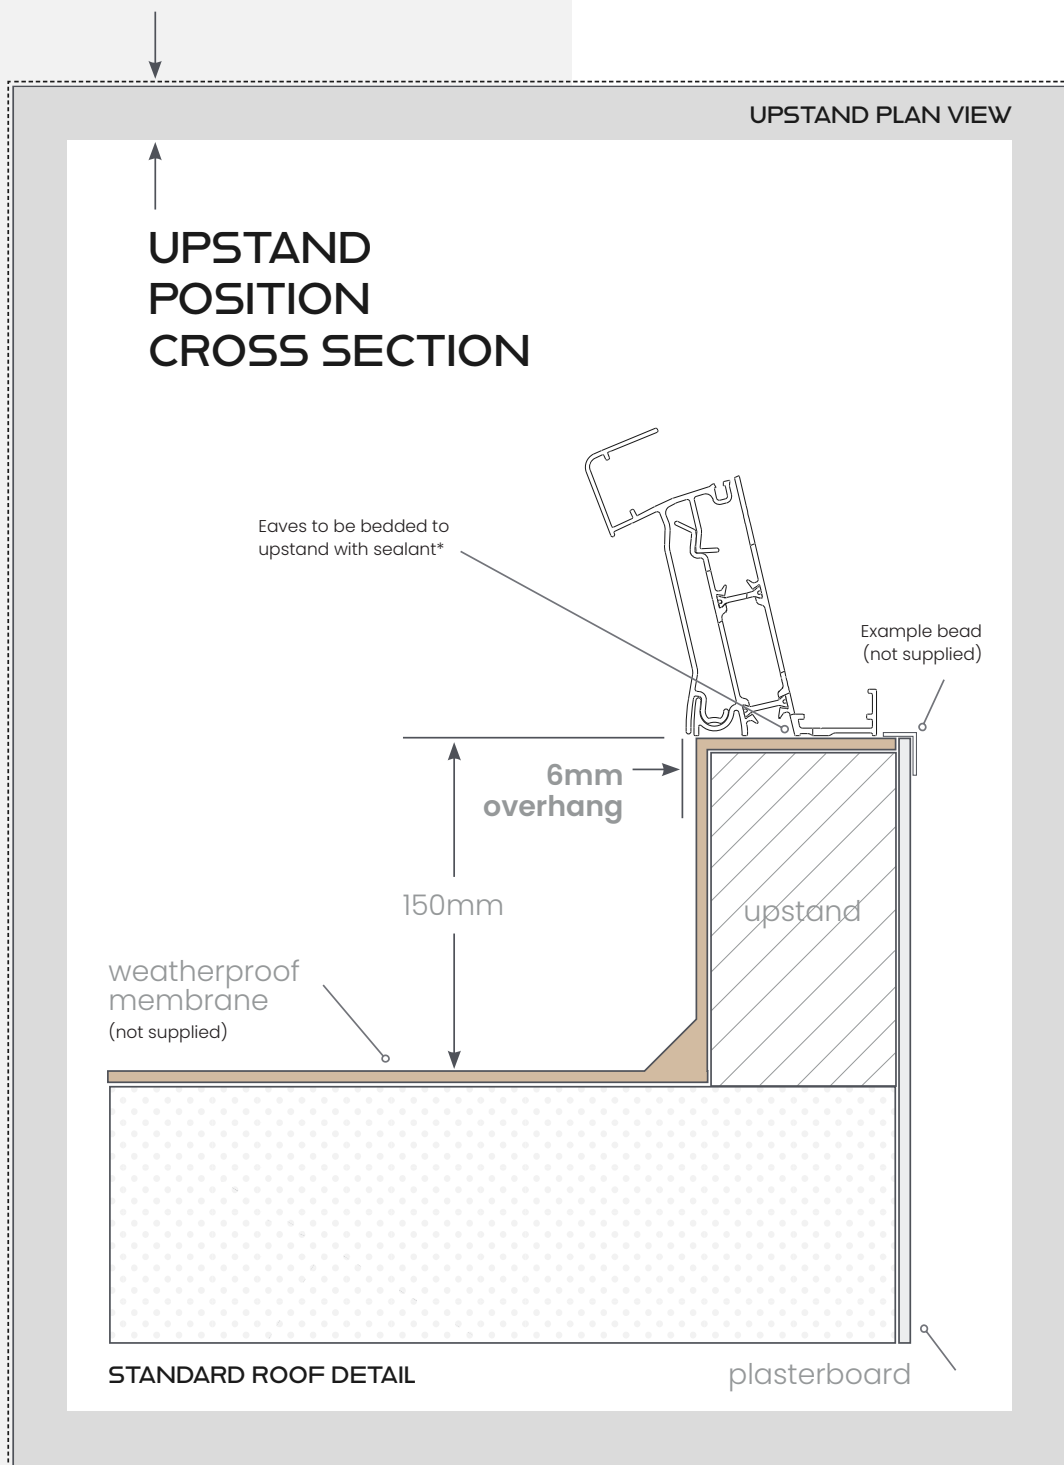

We also recommend that you increase the size of the Lantern by 12mm in both length and width which will give you 6mm overhang all round.

**Example**

Upstand (inc Membrane)	1840 x 1220mm
Overhang	12mm x 12mm
<b>Roof Size</b>	<b>1852 x 1232mm</b>

Upstand **must** be a minimum of 69mm wide (width of lantern eaves beam), level and square.

It is the responsibility of the installer to determine the finishing detail of the inside.

\*Sealant to be applied to the underside of the eaves as per installation guide instructions only
